protecting your digital cargo

KEY FEATURES & BENEFITS ■ MICRO – X.SMALL ■

slim-line protection for your extra small notebook

Having problems finding a protective, light weight bag that fits your notebook or portable dvd player? **Micro** is a light weight, slim line bag, custom tailored to fit most devices with screens up to 10.2".

The protective laptop section uses a combination of high density padding and a rigid board to keep your device safe from the outside world. The comfortable, padded handles tuck away out of sight when you use **micro** as a shoulder bag. There's also space for cables and adaptors.

Micro can also be used as a travel bag. Your wallet, passport and other necessities can be quickly accessed while your larger items are protected inside an STM backpack.
